INTERESTS

CAREER OBJECTIVE

Self-motivated full stack web developer seeking opportunities to learn and grow in a collaborative, team environment. Experience designing and programming MERN applications, working with multiple programming languages, and troubleshooting and debugging. Excellent written and verbal communication skills, critical thinking, and a strong attention to detail.

EDUCATION

UT Austin, *Full Stack Developer Program*   July 2018 – Oct. 2018
- Applied "social coding" accepted and best practices (including version control, issue tracking, functional feedback, etc.) as well as Agile methodology in project development
- Built frontend mobile responsive web applications utilizing HTML5, CSS3 frameworks (Bootstrap, Materialize), JavaScript (ES6) jQuery, and React.js
- Implemented RESTful web services in full stack applications utilizing Node.js, Express.js, and both SQL and MongoDB databases

Udacity, Inc., *Full Stack Web Developer Nanodegree*   Oct. 2017 – March 2018
- Part-time, online full stack program that I began while working full time with HomeAway
- Built server-side web applications in Python using relational databases (SQL) to persistently store data

Texas A&M University at Galveston, *M.S. Marine Biology*

University of Texas at Austin, *B.S. Biology*
